Series TR, TRS

Position sensors employing conductive-plastic resistance and collector tracks provide direct means of measuring position or profile, without the need of any form of solid mechanical coupling.

An important and special feature of these particular units is their robust, industry-proven design. Of particular significance is the double bearing arrangement which really comes into its own when side forces (such as would be experienced in a cam-following application) are met. The rear end of the actuator shaft has a special collar, which can be very easily employed where automatic retraction by means of air cylinders or solenoid is required.

Special features

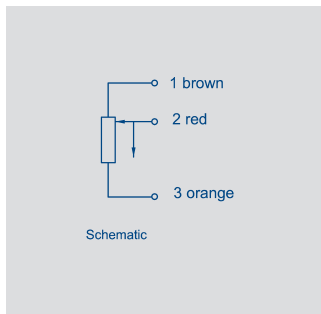

- long life - 100×10^6 movements
- outstanding linearity - up to 0.075 %
- choice of plug or cable connection
- DIN standard gauging end
- double bearing system on shaft
- insensitive to shock and vibration

Description	
Housing	aluminium, anodized
Actuating shaft	stainless steel with anti-rotation device, inside thread M 2.5 x 6
Fixings	adjustable clamps
Gauging head	stainless steel with external M 2.5 thread and hardened ball point
Bearings	both ends in DU plastic bearings
Resistance element	conductive plastic
Wiper assembly	precious metal multi-finger wiper, elastomer-clamped
Electrical connections	3core stress-relieved, shielded cable, 2 m
type TR	plug connector
type TRS

Protection class	IP 40 (DIN 400 50 / IEC 529)	

Included in delivery

2 fixing clamps Z-45 incl.
4 screws M4x10,
1 gauging head with hardened ball point

Recommended accessories

Plug type EEM 33-70, protection class IP 67
Plug type EEM 33-71, protection class IP 40
Plug type EEM 33-72, protection class IP 40
1 roller head Z 50
Process-controlled indicators MAP... with display,
Signal conditioner MUP.../
MUK ... for standardized output signals

Important

All the values given in this data sheet for linearity, lifetime and temperature coefficient in the voltage dividing mode are quoted for the device operating with the wiper voltage driving on operational amplifier working as a voltage follower, where virtually no load is applied to the wiper ($I_e \leq 1 \mu\text{A}$).
